Subject: 2/11 Overwatch League Analysis
Body:

I've collected chat logs from Twitch, and I was able to filter out best plays within the game. In this post, I'll try to cover parts where people reacted to different events. Main contribution in this work is producing query words I have used to analyze, since I had to have sufficient understanding in this area (OWL) and the culture of Twitch.

I've collected data from '#overwatchleague' and '#overwatchleague_kr', since I have some understanding in American OWL&Twitch culture and have full understanding in Korean OWL&Twitch culture. I didn't crawl '#overwatchleague_fr', since I had no particular understanding in their's.
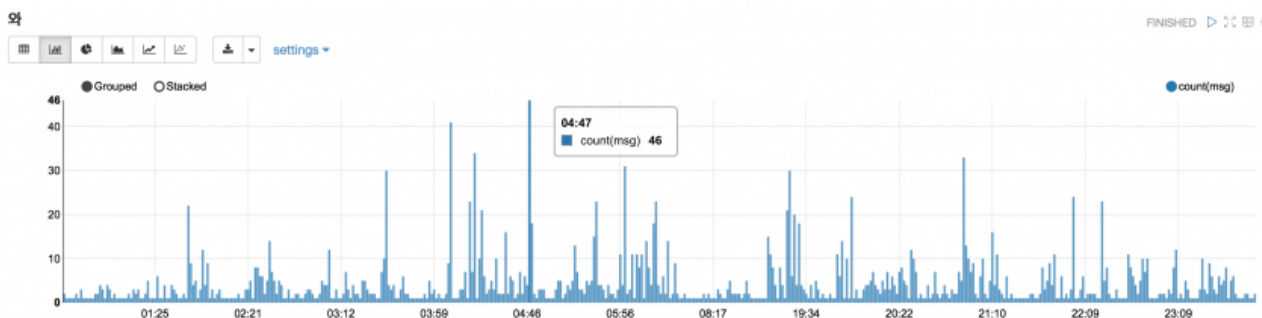

Pogchamp
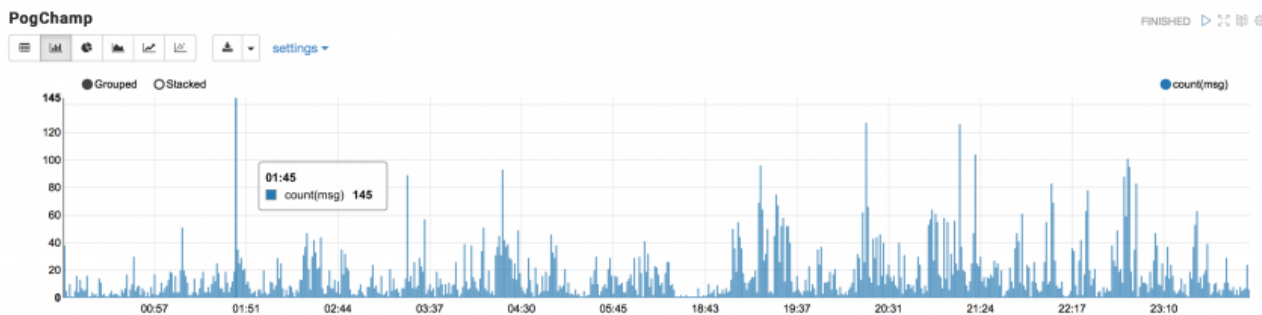

PogChamp is a meme **western** Twitch users use when they see something sick.
In this peak, Carpe(Philadelphia) outplayed Florida with McCree.

와(Woah)

This is a typical exclamation **Koreans** shout when they are surprised. This query and PogChamp was two different ones, but had one thing in common. They had peaks that have way larger value than the surroundings, meaning it is a important signal.
In the highest peak, it was SBB who cleaned up the point and win the round. It was a stunning play indeed.

ㅋㅋㅋ(LOL)
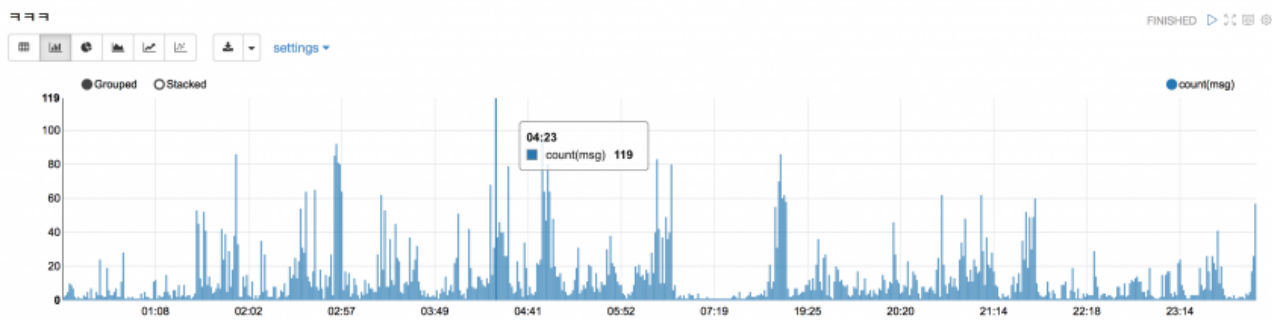

ㅋㅋㅋ is a Korean Term of Laugh Out Loud. It is used a lot in situations where people see a trolling play or when a unexpectedly humorous thing happens. This query also showed good discrete points where are people had fun in contrast to where they had moderate expressions of fun.
The most entertaining point was where in the overtime, all players jumped into the cart and had a really dirty fight.

Player of the Day: JJONAK
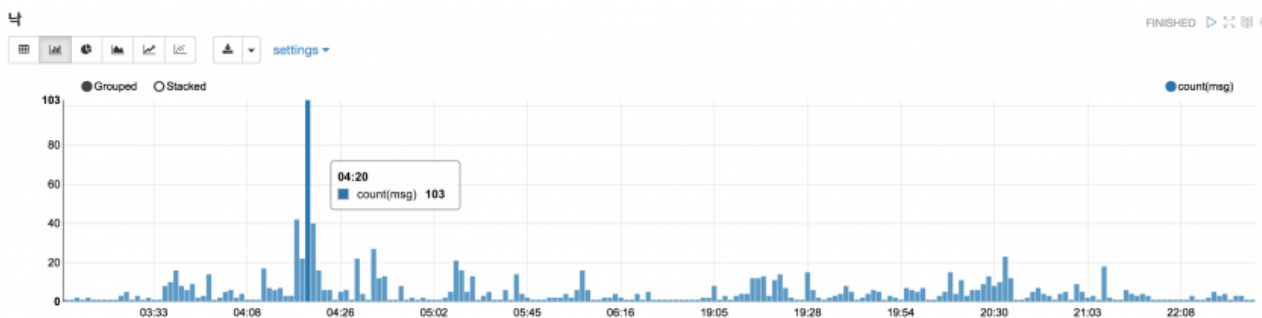

Player of the Day was selected by looking for who has the highest peak of calling the name through out the day. It included famous aliases/nicknames. People tend to shout out players' names when the player trolled or made a great play.
The highest was JJONAK, Zenyatta of NYXL. He carried his team with Roadhog in Junkertown.
The top Zen in town carrying with Roadhog was enough to surprise everyone.

Player of the Day Runner Up: NUS
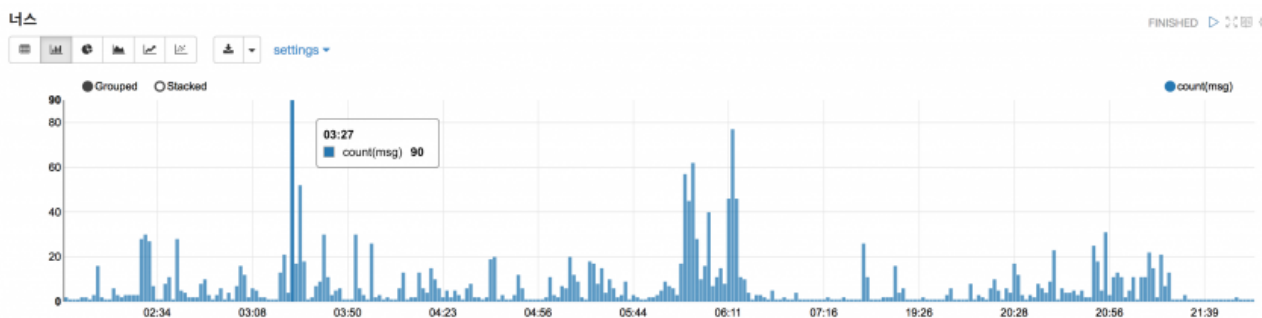

Player of the Day Runner Up was NUS, support of London Spitfire. NUS had a really hard time positioning himself and surviving. The crowd mocked him as he trolled Spitfire. Glad that he is performing better these days.

Awful Observing!
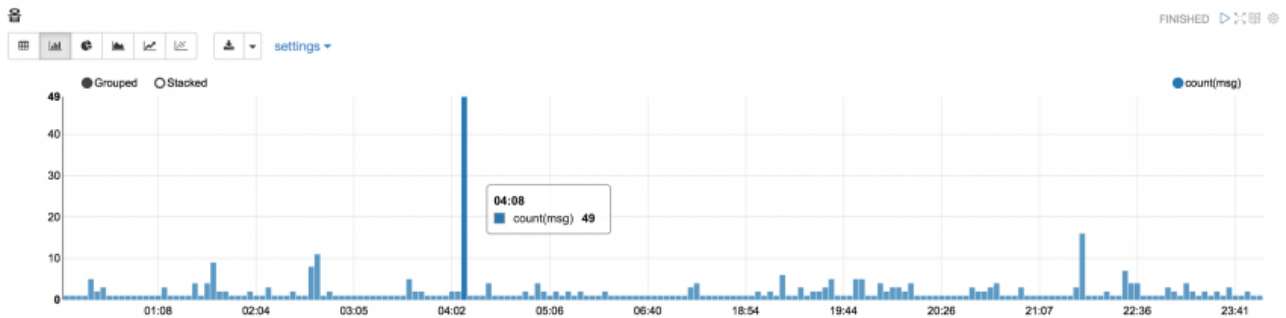

Observing was one of the biggest issues in OWL. The previous premier Overwatch competition, APEX from OGN, was way better in observing than OWL does. People couldn't stand it. Actually, it was sad that they couldn't catch the stunning moments.
My query shows exactly the point where people complained. Where Pine caught 4 kills with Widowmaker, observer didn't show any of the kills.
